

Acquisition of Electrovac´s Glass To Metal Seal business division - the perfect fit

Text: Electrovac

Chur, June 1st 2010

BC-TECH HOLDING AG (www.bctech.ch) based in Switzerland, formed in 1995 and well known as a specialist for customized glass to metal seals, has acquired the entire glass to metal seal business from Electrovac Curamik GmbH. The financing of the acquisition was accomplished by Mr. Alois Döbler, who is the CEO of Electrovac's long established local bank.

Electrovac has over 60 years experience in glass to metal seals and is globally well known as leading component supplier to the automotive industry for both active and passive safety systems. Electrovac is also a very knowledgeable partner for developing and production of hermetic packages for special housings in high volumes for various sensor systems and customized solutions in the industrial, aerospace and medical market segments.

The two plants, Electrovac Hacht & Huber GmbH, in Salzweg close to Passau and Electrovac Metall- Glaseinschmelzungs GmbH in Klosterneuburg near Vienna, have extensive high volume automated production processes, and employ over 350 highly motivated and skilled people, which will provide an ideal foundation for future business development.

Our customers have been accustomed to our usual high product quality level, which can only improve with the cooperation and experience of both Glass To Metal Seal manufacturer's, whose synergy will allow us to further enhance our processes and reliability.

Business strategy of BC-TECH and Electrovac will remain focussed on glass to metal seal technology, which consists of developing and manufacturing of hermetic packages including production of sub components (stampings, glass performing) and plating technology.

Our highly competent on site teams, who are well known throughout the industry, will continue to provide the very best service. Both our managing directors, Mr.Christian Bargähr and Mr. Dieter Thumfart can be contacted at any time.
